City of Rockford, Winnebago and Ogle Counties, Illinois

Members of the Committee:

My husband and I live on Junction Rd just south of the proposed data center site. We are in extreme opposition to this monstrosity for several reasons. This will not only increase electric bills and poison our water, it will devalue our homes and property... It will destroy the forest preserves in the area and harm all wildlife around us. And it will increase the risk of our health. I already have an existing lung problem. The toxins that will be put into the air will just increase the risk of more health problems to, myself my family and my neighbors. WE DO NOT NEED A DATA CENTER AND WE DON'T WANT ONE! if you aren't willing to put this in your neighborhood... Don't put it in ours!
