I live one mile south of this proposed tif district into Ogle County. I love the small town peaceful country atmosphere. My husband and I have lived here since 1999. We raised our family here. We have a nice sized garden with chemical free produce that we grow for ourselves and our neighbors. We have no reason to want to move. We are senior citizens without the means to move, and we don't want you to make it so we lose our way of living. An industrial park would take away the whole landscape of this area and also the peace and quiet that we live in the country for. We don't want industrial noises, all the traffic and congestion that this would bring with will destroy this area. A data center would put toxins in the air and water and destroy all the Eco system and wildlife around us. There is a beautiful Forest preserve next to this property. Do you want to be responsible for destroying this also?. Can you be comfortable with adding a health hazard to our community. Since this is for Rockford and Winnebago County what are the benefits for the residents that live in Ogle county just south of this site??? I guess Nothing!!. We don't infringe on your lifestyle or family, please don't do this to ours!

Thank you, Sally Johnson
